COMPANY SNAPSHOT

Allied Industrial Group is a Michigan-based manufacturing and engineered solutions partner supporting a wide range of industries with precision manufacturing, fabrication, assembly, automation, and custom engineered solutions.

We provide flexible support from prototype and low-volume production to full-scale manufacturing, helping our customers solve complex challenges and bring high-quality products to market.

MARKET POSITION

Tier 2 / Tier 3 Manufacturing Partner

SERVICE MODEL

Prototype • Production • Build-to-Print
Engineered Solutions

LOCATION

Fenton, Michigan | USA

THE ALLIED ADVANTAGE

ENGINEERING-MINDED

More than a build-to-print supplier. Allied brings problem-solving and application expertise to complex manufacturing challenges.

FLEXIBLE MANUFACTURING

Support from prototype to high-volume production with the ability to quickly adapt to changing needs.

MULTIPLE CAPABILITIES UNDER ONE ROOF

Machining, fabrication, welding, assembly, tooling, and automation solutions.

RESPONSIVE & COLLABORATIVE

Direct communication between customers, engineering, and manufacturing teams.

SECOND-SOURCE & CAPACITY SUPPORT

A capable partner for overflow production, supply-chain resilience, and qualified backup sourcing.

CUSTOM SOLUTIONS

Built around the specific application — not limited to an off-the-shelf product catalog.

CORE CAPABILITIES

PRECISION MACHINING

- CNC machining (3-, 4-, & 5-axis)
- Tight tolerance components
- Complex geometries
- Prototype to production
- Material versatility

FABRICATION & WELDING

- Sheet metal fabrication
- Forming, sawing, cutting
- MIG, TIG, and spot welding
- Welded assemblies
- Brackets & enclosures
- Finishing & deburring

ASSEMBLY & INTEGRATION

- Mechanical assemblies
- Electromechanical assemblies
- Kitting & component sourcing
- Functional testing
- Serialization & traceability
- Pre-production builds
- Production assembly

AUTOMATION & ENGINEERED SOLUTIONS

- Custom automation support
- Engineered mechanical systems
- Robotic integration
- Application-specific solutions
- Process improvement
- Torque arm solutions
- Turnkey systems

INDUSTRIES WE SUPPORT

- Automotive
- Industrial Equipment
- Material Handling
- Energy & Power Generation
- Agriculture & Off-Highway
- Construction Equipment
- Food & Beverage
- Consumer Products
- Electronics & Electrical
- HVAC
- Defense & Aerospace
- Medical Device
- Pharmaceutical
- And More

QUALITY & COMPLIANCE

SYSTEMS & PROCESSES

- Controlled Document System
- Material Traceability
- Calibration Management
- Inspection & Testing Procedures
- First Article Inspection Capability
- Supplier Quality Management
- Continuous Improvement Culture

Quality systems and processes designed to support the requirements of our customers across multiple industries.

EQUIPMENT & CAPACITY SNAPSHOT

CAPABILITY	DETAILS
CNC Machining	3-Axis, 4-Axis, 5-Axis Up to 84" x 40" x 30"
Fabrication	Shearing, Forming, Welding, Sawing, Drilling, Finishing
Welding	MIG, TIG, Spot Certified Weld Procedures
Assembly	Mechanical & Electromechanical Subassemblies
Engineering	Design Support, DFM, Process Improvement
Facility	100,000+ Sq. Ft. Climate Controlled
Capacity	Multiple Shifts Available Scalable for Program Needs
